SUMMARY

Full Stack Developer with 2.5+ years of experience building production web applications across creative agency, automotive rental, parking management, and e-learning platforms. Deep experience with Next.js, React, and Laravel/CodeIgniter, spanning UI implementation, backend integration, and database design across both modern and legacy ecosystems. Comfortable owning features end to end, from requirements through deployment, with working knowledge of CI/CD pipelines, containerization, and unit testing practices. Complements web development with additional expertise in machine learning, applied through academic research and hands-on model building.

EXPERIENCE

Fullstack Developer

Jan 2024 - Present

Ladeva Software, Wonosobo

- Built and maintained multiple production web platforms across different industries, including a creative agency company profile, a car rental booking system, a parking management platform, and a Japanese language e-learning site.
- Developed an internal project management CRM for Ladeva, streamlining company workflows and cross-project tracking.
- Delivered end-to-end full-stack solutions spanning UI implementation, backend integration, and database design across both modern (Next.js, React) and legacy (CodeIgniter) ecosystems.
- Collaborated within a Linux-based development environment with CI/CD pipelines for consistent, reliable deployments.

Fullstack Developer

Jan 2025 - Dec 2025

Codeva Technologies, Remote

- Built Mini Commerce, an online shop platform for a clothing distro brand, covering product catalog, product detail pages, and shopping cart flow.
- Developed reusable, type-safe UI components with React and TypeScript to keep the codebase consistent and maintainable as features grew.
- Implemented client-side routing and page structure using Next.js, balancing static and dynamic rendering for better load performance.
- Wrote component and integration tests using Vitest to catch regressions early and maintain code quality across releases.
- Collaborated closely with design references to ensure the storefront UI matched brand identity and remained responsive across devices.

INTERNSHIP

Fullstack Developer

Aug 2024 - Dec 2024

Vocasia, Remote

- Built a bootcamp training course platform supporting cohort-based learning content and enrollment management.
- Developed a Prakerja certification site, handling certification workflows for government-subsidized training programs.
- Built an English TOEFL preparation site with structured practice modules.
- Worked across both MySQL and MariaDB-backed systems, containerized with Docker for consistent environments.

Frontend Developer

Mar 2024 - Jul 2024

Core Initiative Studio, Remote

- Built a clothing e-commerce frontend using Vue.js, focused on responsive UI and product browsing experience.
- Wrote unit tests with Jest to ensure component reliability and reduce regression bugs.
- Integrated Firebase for backend services including data storage and authentication.
- Worked within a CI/CD and Docker-based workflow to support consistent testing and deployment.

PROJECTS

Ladeva Internal Project Management CRM

Aug 2025 - Present

Developer & Maintainer

- Built an internal CRM used company-wide at Ladeva Software House to manage projects, track tasks, and coordinate cross-team workflows.

Nihonbashi Online Class

May 2026 - Aug 2026

Developer

- Developed an e-learning platform for Japanese language courses, including class scheduling, learning materials, and student enrollment management.

Albatross Rent Car

Jan 2026 - Feb 2026

Developer

- Developed a car rental booking platform covering vehicle listings, availability scheduling, reservations, and rental management.

Rahajoe Creativa

May 2025 - Aug 2025

Developer

- Built a company profile and portfolio platform for a creative agency, covering service showcase, project galleries, and client-facing content pages.

The Moby Park

Aug 2024 - Dec 2024

Developer

- Built a glamping and room booking platform, covering room/glamping unit listings, availability calendars, and reservation management for guests.

EDUCATION

Bachelor of Computer Science - Informatics Engineering

Feb 2021 - Aug 2026

Science Qur'an University, Wonosobo, ID

- **Thesis:** Earthquake Risk Classification Using XGBoost Based on BMKG Seismic Parameters.
- **Coursework:** Machine Learning, Data Structures & Algorithms, Database Management Systems.

CERTIFICATES

Fullstack Developer

Skilvul

MEVN Developer

CODEPOLITAN

NodeJs Developer

Kotakode

SKILLS

TypeScript	Expert	JavaScript (ES2023)	Expert
PHP	Expert	Python	Expert
React & Next.js	Expert	MySQL	Expert
PostgreSQL	Advanced	Firebase	Advanced
MongoDB	Advanced	Laravel	Advanced
Codeigniter	Advanced	Node.js	Advanced
GraphQL & REST APIs	Advanced	Tailwind CSS	Advanced
Testing (Playwright, Vitest)	Advanced	State (Zustand, React Query)	Advanced
Web Accessibility (WCAG)	Advanced	CI/CD & Docker	Intermediate
